

# Subsidised bus service contract recommendations: financial implications

Date of meeting23 August 2024Date of report30 July 2024

Report by Director of Finance & Corporate Support

# 1. Object of report

To advise the Committee of the financial implications of the subsidised bus contract recommendations being considered at the meeting.

### 2. Background to report

The 2024/2025 approved budget for support to local tendered services and MyBus contracts increased by £564,148 (4.1%) to £14,267,633 when the budget was approved in March 2024. The budget was increased in recognition of the scale of contract cost increases experienced over the previous two years. For context, since 2022/2023 the overall budget has increased by £2,005,836 (16.4%).

To achieve this budget increase, it was necessary to critically review all other expenditure areas with a view to reducing costs and commitments where possible, with a focus on those which had the least impact on the services SPT provides. The approved subsidised budget allows limited scope for accommodating expected and unforeseen costs arising from in year contract specification amendments, tender renewals and inflationary increases in contract prices in line with the Conditions of Contract.

The current projected outturn position prior to papers recommended to this Committee is detailed below:

2024/2025	Net Approved	Net Projected	Projected
	Budget	Outturn	Overspend
Subsidised bus services	£14,267,633	£14,669,781	£402,148

The projected overspend is due to a number of factors including the extension to contracts on the Isle of Arran and increased costs of tender renewals. During the course of the financial year, actual contract costs continue to be monitored and compared to budgeted costs. Actual costs are reflected following receipt of the 4-weekly returns, which provide details of services operated and income generated.

#### 3. Outline of proposals

Bus contracts are reviewed and retendered having assessed the current need and existing network provision. At this time, there remain many challenges in the network. SPT continues to review the gaps in the bus network arising from commercial operators' decisions to vary or

cancel services and provides direct support in the form of subsidised services in accordance with the SPT Framework for Supporting Local Bus Services, where budgetary constraints allow. Should the Committee accept all the recommendations contained within the following papers, this will result in further increased costs to SPT in 2024/2025 of £92,408 against the current 2024/2025 budget projection. The net impact to SPT's budget is detailed below:

2024/2025	Net Approved	Net Projected	Projected
	Budget	Outturn	Overspend
Subsidised bus services	£14,267,633	£14,762,189	£494,556

If contract cost increases as a result of financial pressures on bus operators (including reduced government support, inflationary pressures on operational costs and driver shortages) and are sustained at this high level over the short to medium term, then this will have a significant impact on future subsidised bus budgets with the potential for reduced network provision or frequency of services, especially if the overall funding envelope stays the same or is reduced.

The supported bus service provision is reviewed on an ongoing basis with mitigations put in place where possible. These mitigations include reviewing specifications and altering timetables to ensure the best value possible for each contract is achieved. This has been achieved for some contracts by removing journeys with low passenger numbers or providing scope for optional timetables offering enhanced provision and optional farescale.

However, in light of the sustained increased costs seen in supported bus services in recent years and the projected overspend for 2024/2025, further mitigations are now required. A critical review of all existing contracts is being undertaken which may result in potential changes to contract specifications including reduced frequency and/or service day coverage. In the worst case scenario this could result in contract cancellations. These options are being assessed and will be reported to a future committee with a view to addressing the current 2024/2025 position and subsequently reducing the impact on future year budgets.

# 4. Committee action

The Committee is asked to note:

- the financial implications of the recommendations relating to the subsidised bus services budget in the following papers and give due consideration to this in the course of the decision making - the impact of individual decisions is reported in each paper for consideration;
- (ii) the projected overspend reported which removes the scope SPT has to support the regional and local network in the remainder of the financial year; and
- (iii) the impact of the current financial pressures on the subsidised bus budget in the short to medium term, including in the current and future financial years. The ongoing assessment of the current supported bus service provision is aimed at delivering potential options to reduce the current overspend in 2024/2025 and future financial year costs will be reported to a future committee.

# 5. Consequences

Policy consequences	None directly.	
Legal consequences	None directly.	
Financial consequences	As detailed in the report.	
Personnel consequences	None directly.	

Equalities consequences	Reduced financial flexibility may impact on SPT's ability to support social necessary services.
Risk consequences	None directly.
Climate Change, Adaptation & Carbon consequences	Any reduction in socially necessary bus services may increase personal car usage in the SPT area.
